

Pelleted Peanut Hulls

Light to Dark Brown in color, essentially odorless, fibrous material, pellets 5/16-inch diameter, approx. 1-inch in length. No additives and/or binders. Excellent Flow characteristics.

Uses:

- Feed Ingredient
- Absorbent Material
- Fiber Ingredient
- Cellulosic Products
- Inert Filler Products
- Extender Products
- Soil Additives
- Soil Amendment Products
- Alternative Biomass Fuel

PRODUCT SPECIFICATIONS

Variable Characteristics

Pellet Diameter:	5/16"
Bulk Density: (lb. per cubic Ft.)	38 - 45 (Typical 40)
Btu Value: (Btu/lb)	7850 - 8100

Physical Composition*

Color:	Light to dark brown
Odor:	Essentially none
Moisture (Karl Fisher):	4.5% - 6% (Typically 5%)

Chemical Composition*

Ash:	2.5% - 3.5%
Crude Fiber:	60% - 65%
Cellulose:	35% - 45%
Lignin:	27% - 33%

*The total analysis does not approximate 100 percent because the crude fiber assay includes much of the cellulose and lignin.
